

K. SYED KAJA MYDEEN

Data Analyst | SQL • Python • Power BI • Excel
Chennai, Tamil Nadu | 9003852868 | kajamydeen070@gmail.com | kaja-portfolio.vercel.app |

PROFESSIONAL SUMMARY

Results-driven Data Analyst with hands-on experience in data wrangling, EDA, dashboard development, and KPI reporting. Proficient in Python (Pandas, NumPy, Matplotlib, Seaborn), SQL (MySQL), and Power BI. Proven ability to process 10,000+ records, deliver actionable insights, and build interactive dashboards that improve reporting efficiency. Certified in Data Analytics with project experience across sales, sports analytics, and customer behavior domains.

TECHNICAL SKILLS

Languages: Python (Pandas, NumPy, Matplotlib, Seaborn), SQL (MySQL) **BI & Visualization:** Power BI (DAX, Power Query), Excel (Pivot Tables, VLOOKUP)
Database: MySQL, Complex SQL, Joins, Aggregations, Window Functions **Analytics:** EDA, Predictive Modeling, KPI Tracking, Data Storytelling
Tools: Jupyter Notebook, Git, VS Code, Google Sheets **Core:** Data Cleaning, ETL, Report Automation, Business Intelligence

PROJECTS

IPL 2026 Season Performance Analysis

SQL & Power BI

- Extracted and queried structured IPL 2026 match data using advanced SQL (MySQL) — including joins, subqueries, window functions, and aggregations — to analyze team and player performance across the season
- Developed a multi-page interactive Power BI dashboard featuring KPIs such as runs scored, wickets taken, strike rates, economy rates, and net run rates (NRR), enabling drill-down analysis by team, venue, and match phase
- Applied DAX measures and Power Query transformations to clean and model raw data, ensuring accurate aggregation across 70+ IPL matches
- Identified performance trends including top run-scorers, leading wicket-takers, best powerplay teams, and death-over specialists using SQL analytical queries
- Delivered visual storytelling through heatmaps, bar charts, line graphs, and scorecards that translated raw match data into clear, actionable insights for cricket strategy analysis

Sales Performance Dashboard

Power BI & Excel

- Analyzed 10,000+ sales records to uncover revenue trends, profit margins, and regional performance disparities across multiple business units
- Designed interactive Power BI dashboards with dynamic slicers, drill-through filters, and DAX-calculated KPIs including YoY growth, sales targets, and gross margin
- Automated reporting workflows through visual dashboards, reducing manual reporting time by 30% and enabling real-time business monitoring
- Identified top-performing products and underperforming regions, providing data-driven recommendations that informed sales strategy

Customer Churn Analysis

Python & SQL

- Cleaned, transformed, and analyzed customer behavioral datasets using Python (Pandas, NumPy) and SQL to identify churn patterns and high-risk customer segments
- Built predictive models achieving 85% accuracy in churn identification using classification techniques, enabling proactive customer retention strategies
- Performed feature engineering and correlation analysis to pinpoint key churn drivers including contract type, tenure, and service usage patterns
- Visualized churn insights through Seaborn and Matplotlib charts, supporting the customer success team with actionable retention recommendations

INTERNSHIP EXPERIENCE

Data Analytics Trainee – Besant Technologies, Chennai

2024

- Completed structured training in Python, SQL, and Power BI; performed EDA on industry datasets applying data cleaning, transformation, and statistical analysis techniques.
- Built interactive dashboards and automated reports; developed SQL queries for data extraction and created Power BI reports integrating multiple data sources for non-technical stakeholders.

EDUCATION & CERTIFICATIONS

B.E. Computer Science Engineering – PSN Institute of Technology and Science, Tirunelveli

Graduated 2026

- Data Analytics Certification – Besant Technologies | Python, SQL, Power BI, EDA, Data Visualization, KPI Reporting
- Data Visualisation: Empowering Business with Effective Insights – Tata / Forage | Framing Business Scenarios, Choosing & Creating Effective Visuals, Communicating Insights and Analysis (Feb 2025)
